Full Stack Developer

Hello,

I'm Timothy a full-stack developer specializing in Front-end Development. My front-end Stack is Javascript, Swift, NextJs,React and TailwindCSS while my back-end Stack is nodejs , mySQL, sqLite and Python. I currently reside in Hamilton but looking to expand my horizons and find a company that can help me grow as a developer. I aim to make responsive and deliciously designed applications to improve user experience.

Projects

1 Dev Academy Aotearoa

Auckland

January 2023 — May 2023

As a Dev Academy graduate, I've honed my technical skills in JavaScript, HTML/CSS, React.js, Redux.js, and TypeScript. I've embraced Test-Driven Development for quality code and Agile methodologies for effective project management. Additionally, I'm adept at implementing responsive designs using Tailwind CSS and collaborating via Git for version

2 CS50x Final-Project-CoffeeSnob
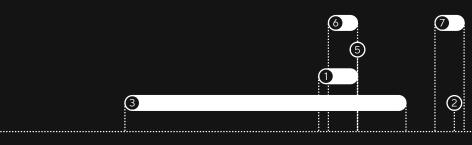

Hamilton

March 2024 — March 2024

For my final project for CS50x I created an IOS app called CoffeeSnob to help showcase my passion for front-end development. Initially created in React-Native with javascript and Expo and an ambitious prototype to use as a reference.The final result ended with me learning a new language from

3 Career transition

Gap Year

May 2021 — October 2023

I took a gap year to focus on personal growth and explore new interests. During this time, I discovered freeCodecamp and started to explore the world of coding. I also worked on art to nurture my creativity and improve my artistic skills. As I delved deeper into coding, I applied for a free Harvard course called cs50 Intro to Computer Science to gain a solid foundation
